Description:

Do you want to learn how to apply makeup to achieve different looks? Or, are you looking to update your look or learn which products are best suited for you?

In this hands-on makeup lesson you'll learn everything you need to know about achieving a long-lasting flawless makeup look to suit your preferences and lifestyle. We will go over all the different makeup steps, techniques, products, and tools for the look(s) you desire. Bring your personal makeup bag along so that we can go through your makeup items and discuss what you need to keep, toss, and add to get the best use out of your collection. In addition, avoid being lost, confused, and stuck in long lines at the beauty counter. I will go and pick up the recommended items for you at no additional charge (up to a \$200 value!). Please note you will be responsible for the full item costs and all applicable taxes for purchased items.

You will leave your lesson equipped with the knowledge to create your daily 5 minute makeup look, as well as the know-how to take that simple every day look to a full on glamorous look for special occasions and nights out. As a bonus, you will take home a detailed lesson outline for reference and a face chart of the looks that we create for you so that you can work on re-creating them at home.
